

FOLSTACK PULSE®

5-15-10+4 PULSE-CROP FOLIAR

Support Roots, Flowering and Pod Set.

FolStack Pulse is a crop-specific 5-15-10+4 foliar fertilizer developed for peas, lentils, chickpeas, beans and alfalfa. Its phosphorus-forward formulation supports root development, flowering, pod set and overall crop performance.

HOW FOLSTACK PULSE WORKS

**SUPPORT
EARLY GROWTH**

- 1** Nitrogen supports healthy vegetative development.

**DRIVE
ROOT ENERGY**

- 2** Elevated phosphorus supports energy transfer and root development.

**SUPPORT
FLOWERING + PODS**

- 3** Potassium contributes to crop function, flowering and pod development.

**COMPLETE
THE PROGRAM**

- 4** Sulphur and growth-support components complement pulse nutrition.

KEY BENEFITS

- ✓ Pulse-specific formulation
- ✓ Phosphorus-forward nutrition
- ✓ Supports roots and flowering
- ✓ Supports pod development
- ✓ Fits in-crop programs

BEST FIT

- Field peas
- Lentils
- Chickpeas
- Dry beans
- Alfalfa

HOW TO APPLY

- 1** Apply as an in-crop foliar from active vegetative growth toward early bloom.
- 2** Standard rate: 1 L/acre.
- 3** Use properly conditioned water and follow the product label.

Jar-test unfamiliar tank mixes and confirm crop-stage compatibility.

GUARANTEED ANALYSIS

- | | | |
|-----------------------------------|--|------------|
| N | Nitrogen (N) | 5% |
| P₂O₅ | Phosphate (P ₂ O ₅) | 15% |
| K₂O | Potash (K ₂ O) | 10% |
| S | Sulphur (S) | 4% |

Pulse nutrition built for **roots, flowers and pods.**
