

AnneMaxx[®]

ADVANTAGE + ENHANCE ORGANIC

ORGANIC TWO-PART BIOLOGICAL SYSTEM

Feed the Biology. Support Soil Function.

Advantage (MA1) delivers Annelida's worm-casting-derived microbial diversity. Enhance Organic (MA4) combines natural amino acids, peptides and organic matter to activate biology, improve nutrient release and support certified organic systems.

HOW ENHANCE ORGANIC WORKS

**INTRODUCE
DIVERSE BIOLOGY**

- 1 Advantage supplies beneficial bacteria and fungi in a stable, dormant form.

**PROVIDE
ORGANIC CARBON**

- 2 Enhance Organic supplies carbon and nutrients that feed beneficial microorganisms.

**ACTIVATE
THE SYSTEM**

- 3 Mixing MA1 and MA4 brings the biology and food source together before application.

**SUPPORT SOIL
AND PLANTS**

- 4 Active microbial communities contribute to soil fertility and plant health.

KEY BENEFITS

- ✓ Natural amino acids and peptides
- ✓ Organic matter for soil health
- ✓ Supports nutrient release
- ✓ Feeds beneficial microbes
- ✓ Certified organic production

BEST FIT

- Canola
- Pulses
- Cereals
- Potatoes
- Corn
- Forages

HOW TO APPLY

- 1 Mix 1 L/ac MA4 with 3 L/ac MA1.
- 2 Use 10-16 gal/ac water.
- 3 Apply in soil or as a foliar spray.

Compatibility test before tank mixing. Do not freeze.

COMPOSITION

MA1
Worm-casting-derived microbial diversity.

MA4
Natural amino acids, peptides, organic matter and 3-0-3 analysis.

PACKAGE
Available in 1,000 L totes.

Organic carbon in. **Living soil forward.**
