

CALMAXX®

CALCIUM-RICH GRANULAR FERTILITY

Put Calcium and Phosphorus Where Roots Begin.

CalMaxx is a concentrated granular fertility product supplying nitrogen, phosphorus, sulphur and calcium. Its 9-13-0 + 5S + 15Ca analysis is designed to fit field-specific fertility programs and three-tank seeding systems.

HOW CALMAXX WORKS

SUPPLY PHOSPHORUS

- 1** Delivers phosphorus to support early-season energy transfer and root development.

SUPPLY CALCIUM

- 2** Adds concentrated calcium to support plant structure and root-zone nutrition.

ADD NITROGEN + SULPHUR

- 3** Complements the fertility program with nitrogen and sulphur.

TARGET THE LIMITATION

- 4** Uses soil analysis and crop requirements to place the right rate on the right field.

KEY BENEFITS

- ✓ Concentrated calcium source
- ✓ Phosphorus-forward fertility
- ✓ Supplies nitrogen and sulphur
- ✓ Fits three-tank drills
- ✓ Supports field-specific planning

BEST FIT

Low-calcium soils

Phosphorus-limited fields

Cereals

Canola

Pulses

HOW TO APPLY

- 1** Determine rate from current soil analysis.
- 2** Match the rate to crop, yield target and full fertility plan.
- 3** Maximum Johnston's rate: 60 lb/acre.

Follow the product label and the field-specific fertility plan.

GUARANTEED ANALYSIS

N	Nitrogen (N)	9%
P₂O₅	Phosphate (P ₂ O ₅)	13%
K₂O	Potash (K ₂ O)	0%
S	Sulphur (S)	5%
Ca	Calcium (Ca)	15%

Calcium for structure. Phosphorus for the start.
