

ANNEMAXX[®]

ADVANTAGE + HUMIGRO

HUMIC + FULVIC BIOLOGICAL SYSTEM

Improve Uptake. Support Crop Maturity.

Humigro (MA7) is a 1-2-0 formulation with 9% humic acid, fulvic acids, alginates and amino acids. Paired with Advantage (MA1), it combines a worm-casting-derived biological foundation with compounds designed to improve nutrient uptake and soil function.

HOW HUMIGRO WORKS

INTRODUCE BIOLOGY

- 1** Advantage supplies diverse beneficial microorganisms in a stable dormant form.

ADD HUMIC + FULVIC ACIDS

- 2** Humigro supplies humic chemistry, alginates and amino acids.

SUPPORT NUTRIENT UPTAKE

- 3** The combined system supports nutrient movement and crop access.

SUPPORT MATURATION

- 4** Better nutrient use supports balanced development and crop finish.

KEY BENEFITS

- ✓ Two-part biological system
- ✓ 9% humic acid
- ✓ Humic and fulvic acids
- ✓ Includes alginates and amino acids
- ✓ Supports nutrient uptake

BEST FIT

- Compacted soils
- Saline conditions
- Alkaline soils
- Elevated-calcium soils
- Crops needing maturity support

HOW TO APPLY

- 1** Mix Advantage MA1 and Humigro MA7 at a 1:1 ratio.
 - 2** Standard combined program: 1 L MA1 + 1 L MA7 per acre.
 - 3** Mix at application or up to 48 hours before use.
- May fit a herbicide pass. Condition water and jar-test. Do not freeze.

SYSTEM COMPONENTS

- MA1** Worm-casting-derived biological foundation.
- MA7** 1-2-0 with 9% humic acid, fulvic acids, alginates and amino acids.
- KIT** 1 x MA1 + 1 x MA7, 2,000 L total.

Mobilize nutrients. **Finish with purpose.**
